Dear Candidate:

Welcome! Feet are a complex combination of bones, joints, ligaments, muscles, and tendons that help with one's balance, posture, and mobility. The average person walks approximately 100,000 miles in their lifetime, and having good foot health is vital to one's overall health. As our population continues to emphasize on physical activity, healthy, balanced lifestyle, and the expectation that the number of Americans ages 65 and older will more than double to 80 million by 2040, the need for new doctors of podiatric medicine and their specialized care in complex foot, ankle and lower extremity care is great.

The Dr. William M. Scholl College of Podiatric Medicine plays a significant role in meeting this need. With interprofessional education focused on patient-centered, team-based care, increased clinical opportunities, an emphasis on clinical research, and expanding scholarship opportunities, Scholl College celebrates more than 112 years of keeping Americans on their feet.

Scholl College is an institution that leads now for the same reason it will lead in the future- the timeless quality of its forward -looking education.

Your interest in the Dr. William M. Scholl College of Podiatric Medicine honors and inspires us. We hope your interview is the start of a fulfilling and successful future. Please feel free to contact our office of admissions should you have any questions.

Sincerely,

Stephanie Wu, DPM, MSc, FACFAS
